

Speaker 1 ([00:00](#)):

And but one of the things that we will that if you'll close with this, Dr. Nikolas, let's talk about how important it is that we protect this formulation with a vengeance and not make medical claims. There's sheer good reason why we don't share testimonials. We have plenty. We, you know I know, I know most every one of you on this screen that I'm having the pleasure of looking at, and those of you that I can't see I know you know what you're doing in the world, but it's vital that we not make medical claims. Dr. Nikolas, will you will you address that just briefly with our friends and help them understand why we've taken this?

Speaker 2 ([00:43](#)):

Yes Denise, it is with pleasure. First of all we are very happy at Metron Nutraceuticals that we are in the same corner with ZOI Global regarding this matter. Denise, Loyd, specifically in the network marketing, and we know that serious problems, serious regulatory problems can occur. When we start basing our marketing process in testimonials many companies do it. We commit ZOI Global and Metron committee that we will not do it. Each one of you would, you you've heard stories. You have witnessed success stories. You have witnessed many people are being helped by ClearDrops and already, even though it is a short period that it is in your hands ClearSleep already, people are helping ClearSleep. We have real science in our hands. We don't need testimonials. We live the testimonials to make happy. The companies that they don't have science in the base that marketing efforts only in testimonials. And these will not happen with ZOI and Metron. And also it is a regulatory matter. It is the law you cannot make claims based only on testimonials. We will not do it. The others may do it, let them enjoy their testimonials over zero, absolutely zero scientific value.

Speaker 1 ([02:43](#)):

Thank you, Dr. Nikolas, you know, we never talk about specific diseases, or conditions, and there's a very good reason for that. We're a proven formulation. We rely on the science. If Metron Nutraceuticals can prove it, we will be the first shout it from the rooftops. That's why we're so confident when we speak, we know what's going to happen. We know that we're going to begin to reverse the chronic accumulation of toxins beginning day one. So all of this has proven, okay. So.
