

Speaker 1 ([00:00](#)):

Okay, Carl, let's jump to you.

Speaker 2 ([00:03](#)):

Very good. Thank you, Dr. Nikolas, it's always a pleasure to spend time with you. A question that comes up to us all the time or quite often is if toxins took years to build up in my body to accumulate my body, how many years would it take ClearDrops to eliminate my toxins?

Speaker 3 ([00:22](#)):

Oh, fantastic question, Carl. Thank you. All right. Okay. First of all, you can never be able to eliminate 100% of the toxins that we have accumulated over a period of many, many years, but by using a good product like ClearDrops, you can achieve two things. First. You can reverse the accumulation process that takes place every single day. Let me remind. ZOI Global ClearDrops not only is working in the gut. That means is working in the gut. So to catch your toxins before being absorbed in the gut, but it is the only what the solution of water soluble zeolite that has been proven as capable to cross cellular membranes and work far away from the gut. So first you can reverse the accumulation process of toxins that got into your body today. And second and more important, because exactly clear drops can work also away from the gut. You can reduce the concentration of toxins that have been stored in your body during a period of many, many years in for these reason, practically clear drops. You just start it you don't stop it.

Speaker 1 ([02:10](#)):

Excellent, excellent point. And you know, Dr. Nikolas, I might point out that you said something incredibly powerful about a month ago, and you said you basically believe that detoxification is no longer an option. We don't feel it. We don't see it as it accumulates, and as long as it remains subclinical and you're not having to go because of becoming clinical, then oftentimes by the time it gets to the clinical state, it might be too difficult to overcome.

Speaker 3 ([02:40](#)):

Correct. hopefully you, you take care of these before you start clinical manifestations, because when you start having clinical manifestations of any problem for most of medical problems, it's difficult to reverse. So now we have, we have something that we can use to reverse a chronic accumulation process that took years. And with this in our mind, clear drops were designed for every single day, use to slowly, consistently, and constantly reverse this process slowly.

Speaker 1 ([03:27](#)):

Excellent point. Excellent. Wow. Carl, thank you for bringing that up because that, you know, some people think that this is a start and I'll do it for 30 days or 60 days. And if you're 30 or 60 years old, you have well beyond 30 or 60 days, a necessity for consuming

Speaker 3 ([03:46](#)):

Denise let me add something here in contrast with many Cleanse protocols that are out there in the market, like five days cleanse product, 10 days cleanse protocol, or two weeks cleanse protocol for the liver. I've been asked about protocols that are two weeks protocols to clean your liver. And I say with all due respect, just the question has two mistakes first. How can you isolate your liver from the rest of your body? What are you going to do twice or later?

Second let's suppose. Let's suppose that this claim that these two weeks protocols is going to clean your liver. All right. Let's suppose that you do it. What about the day 15? What about the day16? What about the day 27? What are you going to do are you going to stop drinking water? Are you going to stop eating food? Are you going to stop breathing air? How are you going to eliminate the toxins that get in your body after the completion of the two weeks cleanse protocol for this reason, as a board-certified pharmacist and medical doctor, I have zero belief and trust in these very well-marketed expensive one week, two weeks specific protocols,

Speaker 1 ([05:12](#)):

You know, what's, you know, what's so incredible, Dr. Nikolas, as you sit here and speak, I'm thinking about thank goodness that you thought enough ahead. You found a solution before most of us even knew we had a problem. Okay you know, I know that at my, I mean, I'm 27 years, I'm just kidding. But my goodness, if I had known about this at 27, I would have certainly loved to get gotten ahead of it at that age. So thank you for your answer, Carl, thank you for your question.
