Metron Nutraceuticals, LLC Announces Reexamination of Method Patent at the United States Patent and Trademark Office

FOR IMMEDIATE RELEASE

On **January 22, 2021**, Metron Nutraceuticals, LLC (Cleveland, OH) filed a **Request for *ex parte* Reexamination** with the United States Patent and Trademark Office (USPTO) for recently issued U.S. Patent No. 10,894,721 to the “*Named Inventor*” **Christina Rahm Cook** which she has assigned to **Entox Solutions, LLC** (Austin, TX).

Metron’s Request identified and raised substantial new questions of patentability that serve as means for the **rejection and cancellation of all claims in the Cook/Entox 10,894,721 Patent, which are directed to manufacturing methods clearly taken in part from Metron’s own technology.**

On **January 25, 2021**, only three days after Metron’s request, the USPTO determined that reexamination is warranted.

As a result, the Cook/Entox 10,894,721 Patent is under reexamination.

“We are very pleased by the USPTO’s immediate action in granting Metron’s request for reexamination of the Cook/Entox 10,894,721 Patent. It is our belief that the reexamination will result in cancelling all of the claims set forth in the 10,894,721 Cook/Entox Patent,” says Dr. Nikolaos Tsirikos-Karapanos, the President of Metron Nutraceuticals, LLC.

About Metron Nutraceuticals, LLC

Metron Nutraceuticals, LLC, formed by Dr. Nikolaos Tsirikos-Karapanos in 2014 in Cleveland, Ohio, is a pioneer in the formulation and manufacture of specialized forms of natural mineral compositions for various wellness applications. Metron’s experience, innovative technology formulations, and specialized methods of manufacture have culminated in three U.S. Patents (U.S. Patent No. **9,629,874**, U.S. Patent No. **10,206,948**, and U.S. Patent No. **10,828,324**), one Patent in Japan (No. **6490807**) as well as numerous additional International Patent Pending Applications.
